JOURNAL OF ELECTRON SPECTROSCOPY and Related Phenomena

Subject index

Absorption cross section
Absorption cross sections at the $M_{4,5}$ edges of rare earths: a soft X-ray transmission experiment 187
Ageing
The polyimide (PMDA–ODA) titanium interface. Part 2. XPS study of polyimide treatments and ageing 57
ARXPS
Inverse problem: the concentration depth profile of elements from ARXPS data 67
Auger
Advances in the theoretical simulation of Auger spectra of polyatomic molecules: an example 1
Spectral noise removal by new digital smoothing routine 159
Auger electron spectroscopy
Ab initio calculation of transition rates for autoionization: the Auger spectra of HF and F^- 173
Shadowing of particle motion by surface roughness 237
Autoionization
Ab initio calculation of transition rates for autoionization: the Auger spectra of HF and F^- 173

Binary system
Quantitative determination of the surface composition of binary liquid mixtures. A new method and application 91
Binomial filter
Spectral noise removal by new digital smoothing routine 159
Bond length
Determination of bond lengths of triatomic species using vibrational frequencies 77

Carbon
Advances in the theoretical simulation of Auger spectra of polyatomic molecules: an example 1
Carbonyl
Advances in the theoretical simulation of Auger spectra of polyatomic molecules: an example 1
Cluster
Relation between the photoemission spectra and the electronic density of states of small metallic clusters 99
Cobalt tetrachloride ion
The electronic structure of the $CoCl_4^{2-}$ ion analyzed by means of visible spectroscopy, X-ray photoelectron spectroscopy (XPS) and electron energy loss spectroscopy (EELS) 231
Concentration depth profile
Inverse problem: the concentration depth profile of elements from ARXPS data 67
Configuration interaction
Ab initio calculation of transition rates for autoionization: the Auger spectra of HF and F^- 173
Cylindrical mirror analyser
Internal scattering in a single pass cylindrical mirror analyses 109

Density of states
Relation between the photoemission spectra and the electronic density of states of small metallic clusters 99
Depth profile
Inverse problem: the concentration depth profile of elements from ARXPS data 67

(e,2e) spectroscopy
(e,2e) spectroscopy: from atoms to solids 15
Elastic scattering effects
Towards a universal description of elastic scattering effects in X-ray photoelectron spectroscopy 207
Electroluminescence
A detailed XPS study of the rare earth compounds EuS and EuF_3 45
Electron energy loss spectroscopy
The electronic structure of the $CoCl_4^{2-}$ ion analyzed by means of visible spectroscopy, X-ray photoelectron spectroscopy (XPS) and electron energy loss spectroscopy (EELS) 231
Electron spectroscopy of diffuse reflectance
Study of supported silver states by the method of electron spectroscopy of diffuse reflectance 195
ESDR
Study of supported silver states by the method of electron spectroscopy of diffuse reflectance 195

Europium
A detailed XPS study of the rare earth compounds EuS and EuF_3 45

Fermi edge
Proposed high-resolution and high count rate time-of-flight photoelectron energy analyzer for solid state samples 149
Fluoride ion
Ab initio calculation of transition rates for auto-ionization: the Auger spectra of HF and F^- 173
Force constant
Determination of bond lengths of triatomic species using vibrational frequencies 77

Gaussian surface
Shadowing of particle motion by surface roughness 237
Green operator
Ab initio calculation of transition rates for auto-ionization: the Auger spectra of HF and F^- 173

Hydrogen fluoride
Ab initio calculation of transition rates for auto-ionization: the Auger spectra of HF and F^- 173

In situ fracture
X-ray photoelectron spectra of $KMnO_4$ and K_2MnO_4 fractured in situ 135
Internal scattering
Internal scattering in a single pass cylindrical mirror analyses 109

K matrix
Angular distributions of p-wave electrons from Mg3p*n*s autoionizing states 167

Lanthanon
Absorption cross sections at the $M_{4,5}$ edges of rare earths: a soft X-ray transmission experiment 187
Lanthanon compound
A detailed XPS study of the rare earth compounds EuS and EuF_3 45
Laser
Proposed high-resolution and high count rate time-of-flight photoelectron energy analyzer for solid state samples 149
LCAO
Molecular photoionization cross sections by the local density LCAO Stieltjes imaging approach 29
Level-crossings theory
Shadowing of particle motion by surface roughness 237

Local density
Molecular photoionization cross sections by the local density LCAO Stieltjes imaging approach 29
Local density of states
Relation between the photoemission spectra and the electronic density of states of small metallic clusters 99
Low energy electron diffraction spectroscopy
Reactivity towards oxygen of Te/Si(100) surfaces investigated by ultraviolet photoelectron spectroscopy, X-ray photoelectron spectroscopy and low energy electron diffraction spectroscopy 129

Manganese
Evaluation of Mn3s X-ray photoelectron spectroscopy for characterization of manganese complexes 201
Metallic cluster
Relation between the photoemission spectra and the electronic density of states of small metallic clusters 99
Metastable induced electron spectroscopy
Quantitative determination of the surface composition of binary liquid mixtures. A new method and application 91
Methyl
Advances in the theoretical simulation of Auger spectra of polyatomic molecules: an example 1
Mixed chloride
The electronic structure of the $CoCl_4^{2-}$ ion analyzed by means of visible spectroscopy, X-ray photoelectron spectroscopy (XPS) and electron energy loss spectroscopy (EELS) 231
MLCFA
A detailed XPS study of the rare earth compounds EuS and EuF_3 45
Mn2p
Evaluation of Mn3s X-ray photoelectron spectroscopy for characterization of manganese complexes 201
Mn3s
Evaluation of Mn3s X-ray photoelectron spectroscopy for characterization of manganese complexes 201
Model
(e,2e) spectroscopy: from atoms to solids 15
Advances in the theoretical simulation of Auger spectra of polyatomic molecules: an example 1
Momentum
(e,2e) spectroscopy: from atoms to solids 15
Monte Carlo
Towards a universal description of elastic scattering effects in X-ray photoelectron spectroscopy 207

MQDT
Angular distributions of p-wave electrons from Mg3p*n*s autoionizing states 167
Multichannel quantum-defect theory
Angular distributions of p-wave electrons from Mg3p*n*s autoionizing states 167

Noise reduction
Spectral noise removal by new digital smoothing routine 159
Novel
Quantitative determination of the surface composition of binary liquid mixtures. A new method and application 91

PACS Numbers 3480 Gs 7920 Kz 15
(e,2e) spectroscopy: from atoms to solids 15
Peeling
The polyimide (PMDA–ODA) titanium interface. Part 2. XPS study of polyimide treatments and ageing 57
PES
Proposed high-resolution and high count rate time-of-flight photoelectron energy analyzer for solid state samples 149
Photoionization cross section
Molecular photoionization cross sections by the local density LCAO Stieltjes imaging approach 29
PMDA–ODA
The polyimide (PMDA–ODA) titanium interface. Part 2. XPS study of polyimide treatments and ageing 57
Polyimide
The polyimide (PMDA–ODA) titanium interface. Part 2. XPS study of polyimide treatments and ageing 57
Potassium manganate
X-ray photoelectron spectra of $KMnO_4$ and K_2MnO_4 fractured in situ 135
Potassium permanganate
X-ray photoelectron spectra of $KMnO_4$ and K_2MnO_4 fractured in situ 135
Pressure dependence
Resonance trapping effects in stepwise electron/laser excitation 121

Radiation trapping
Resonance trapping effects in stepwise electron/laser excitation 121
Rare earth
Absorption cross sections at the $M_{4,5}$ edges of rare earths: a soft X-ray transmission experiment 187
Real momentum
(e,2e) spectroscopy: from atoms to solids 15
Shadowing
Shadowing of particle motion by surface roughness 237
Silicon
Reactivity towards oxygen of Te/Si(100) surfaces investigated by ultraviolet photoelectron spectroscopy, X-ray photoelectron spectroscopy and low energy electron diffraction spectroscopy 129
Silver
Study of supported silver states by the method of electron spectroscopy of diffuse reflectance 195
Simulation
Advances in the theoretical simulation of Auger spectra of polyatomic molecules: an example 1
Smoothing
Spectral noise removal by new digital smoothing routine 159
Soft X-ray transmission
Absorption cross sections at the $M_{4,5}$ edges of rare earths: a soft X-ray transmission experiment 187
Solid
(e,2e) spectroscopy: from atoms to solids 15
Proposed high-resolution and high count rate time-of-flight photoelectron energy analyzer for solid state samples 149
Source
Proposed high-resolution and high count rate time-of-flight photoelectron energy analyzer for solid state samples 149
Spectral noise
Spectral noise removal by new digital smoothing routine 159
Stepwise electron/laser excitation
Resonance trapping effects in stepwise electron/laser excitation 121
Stieltjes
Molecular photoionization cross sections by the local density LCAO Stieltjes imaging approach 29
Surface roughness
Shadowing of particle motion by surface roughness 237

Te/Si(100)
Reactivity towards oxygen of Te/Si(100) surfaces investigated by ultraviolet photoelectron spectroscopy, X-ray photoelectron spectroscopy and low energy electron diffraction spectroscopy 129
Tellurium
Reactivity towards oxygen of Te/Si(100) surfaces investigated by ultraviolet photoelectron spectroscopy, X-ray photoelectron spectroscopy and low energy electron diffraction spectroscopy 129
Titanium
The polyimide (PMDA–ODA) titanium interface.

Part 2. XPS study of polyimide treatments and ageing 57
TOF
Proposed high-resolution and high count rate time-of-flight photoelectron energy analyzer for solid state samples 149
Transition rate
Ab initio calculation of transition rates for auto-ionization: the Auger spectra of HF and F^- 173
Triatomic species
Determination of bond lengths of triatomic species using vibrational frequencies 77

Ultraviolet photoelectron spectroscopy
Quantitative determination of the surface composition of binary liquid mixtures. A new method and application 91
Reactivity towards oxygen of Te/Si(100) surfaces investigated by ultraviolet photoelectron spectroscopy, X-ray photoelectron spectroscopy and low energy electron diffraction spectroscopy 129

X-ray photoelectron spectroscopy
A detailed XPS study of the rare earth compounds EuS and EuF_3 45
Evaluation of Mn3s X-ray photoelectron spectroscopy for characterization of manganese complexes 201
Reactivity towards oxygen of Te/Si(100) surfaces investigated by ultraviolet photoelectron spectroscopy, X-ray photoelectron spectroscopy and low energy electron diffraction spectroscopy 129
Shadowing of particle motion by surface roughness 237
The polyimide (PMDA–ODA) titanium interface. Part 2. XPS study of polyimide treatments and ageing 57
Towards a universal description of elastic scattering effects in X-ray photoelectron spectroscopy 207
X-ray photoelectron spectra of $KMnO_4$ and K_2MnO_4 fractured in situ 135
The electronic structure of the $CoCl_4^{2-}$ ion analyzed by means of visible spectroscopy, X-ray photoelectron spectroscopy (XPS) and electron energy loss spectroscopy (EELS) 231
Spectral noise removal by new digital smoothing routine 159
